HAZM 600

META KLEEN

PRODUCT DATA SHEET

PRODUCT DESCRIPTION

HAZM 600 is a blend of inorganic acid, a soluble fluoride compound and other additives to enhance the synergetic performance of the components in the product.

TYPICAL PHYSICAL PROPERTIES

Appearance:	Liquid solution
Color:	Colorless
Specific Gravity, 20°C:	1.103 kgs/liter
pH of the Solution:	3.3

PRODUCT APPLICATION DETAILS

HAZM 600 is an acidic solution formulated to remove black welding smudge and extra fluxes clinging on stainless steel joints after chipping and brushing. It dissolves welding dirt without attacking the base metal. The fast cleaning action of HAZAM 6 is very helpful in preparing the stainless steel welded surfaces prior to sanding and buffing.

HAZM 600 can be use as supplied or it can be diluted with 1 part of the chemical up to 10 parts of demineralised water depending on the amount of smut and fluxes on welded surfaces. The metal must be clean and free from any grease or oil before treatment. HAZAM 6 can be applied by brushing or dipping. Clean the treated surfaces with copious amount of water and observe proper procedures in disposing the used product.

PRODUCT PACKAGING DETAILS

HAZM 600 is available in 20 and 200-liter packaging

PRODUCT HANDLING DETAILS

HAZM 600 is a corrosive solution. Eye and skin contacts should be avoided by wearing protective goggles and suitable clothing while handling the chemical. In case of accident, remove the clothes and wash the affected area with plenty of water. Call for medical assistance immediately.

Keep the material in a cool dry place and avoid contamination with other chemicals.
